The image features a glowing incandescent lightbulb on the left, with its filament emitting a warm yellow light. The background is a dark blue gradient with a faint, glowing blue ring of light on the right side. A blue horizontal bar is positioned across the middle of the lightbulb, containing the text '> Connections'. On the right side of the image, there is a vertical list of numerical values, each preceded by a series of dots and followed by a plus or minus sign. At the bottom right, there is a horizontal row of seven small circles, with the first one being white and the others being blue.

IS ALWAYS ON

OUR MISSION

To reduce or eliminate your company's energy pricing risk and, through real-time execution, bring order to the unpredictable energy market so you can more effectively manage your business.

Through unparalleled attention to detail and customer service, we are committed to setting a standard of excellence to which others aspire.

GLOBAL RESOURCES, LOCAL APPLICATIONS

- Expert market analysis, risk management and sourcing by experienced professional energy managers who are nimble entrepreneurs with big company resources.
- Use of customized, proprietary premium products, including the Vanguard Managed Price and Vanguard Market Index, while maintaining a full complement of standard offerings, including fixed, basis and index products.
- Access to a diversified supply portfolio offering reliability, flexibility and competitive pricing. We do not rely upon just one source of energy. This ensures your company will receive the best pricing available at any given point in time. By contrast, many of our competitors are single-source suppliers.
 - We are an affiliate of Seminole Energy Services and leverage its numerous producer relationships. This allows us to eliminate middlemen and reduce supply costs.
 - We maintain continuous long-term supply relationships with many wholesale trading partners.

WE PROVIDE A FULL RANGE OF CUSTOMIZED ENERGY SOLUTIONS

Supply Management

- Full range of commodity products and services
- Expert risk management
- Diversified supply portfolio
- Real-time market execution
- Storage optimization
- Balancing
- Firm deliveries

Customer Service

- A dedicated Service Consultant provides single point of contact
- Immediate access to Vanguard's Managing Partners

Accurate and Flexible Billing

- Customized billing capability
- Multi-facility billing
- Consolidated billing
- Multiple presentation mediums

ABOUT US

Vanguard Energy Services is an accessible, responsive, highly expert energy services company that provides added-value solutions and risk management for Midwestern commercial and industrial end-users.

We are a group of seasoned frontline energy executives who have leveraged decades of experience across all facets of the energy industry to create a new model for risk management and customer service that transcends current standards.

Our strategic partner, Seminole Energy Services, owns and operates over 325 miles of gathering systems in the Anadarko and Hugoton basins and manages over 350 long-term producer relationships. Seminole has grown rapidly to become one of the leading purchasers of well-head supply in Oklahoma, Kansas, Arkansas and Texas. Unlike other conglomerate marketers, Seminole Energy's primary focus is transporting and supplying commodity services directly from the well-head to end-use customers.
